Independent Auditor's Report

To the Board of Education North Mahaska Community School District New Sharon, Iowa

We have audited the accompanying financial statements of the governmental activities, the business type activities, each major fund and the aggregate remaining fund information of North Mahaska Community School District, New Sharon, Iowa, as of and for the year ended June 30, 2010, which collectively comprise the District's basic financial statements listed in the table of contents. These financial statements are the responsibility of District officials. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with U.S. generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe our audit provides a reasonable basis for our opinions.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business type activities, each major fund and the aggregate remaining fund information of North Mahaska Community School District at June 30, 2010, and the respective changes in financial position and cash flows, where applicable, for the year then ended in conformity with U.S. generally accepted accounting principles.

In accordance with *Government Auditing Standards*, we have also issued our report dated November 30, 2010 on our consideration of North Mahaska Community School District's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

Management's Discussion and Analysis, Budgetary Comparison Information and the Schedule of Funding Progress for the Retiree Health Plan on pages 5 through 11 and 36 through 38 are not required parts of the basic financial statements, but are supplementary information required by the Governmental Accounting Standards Board. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. We did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise North Mahaska Community School District's basic financial statements. Another CPA firm previously audited, in accordance with the standards referred to in the second paragraph of this report, the financial statements for the four years ended June 30, 2008 and we audited the financial statements for the year ended June 30, 2009 (which are not presented herein) and expressed unqualified opinions on those financial statements. Other supplementary information included in Schedules 1 through 6, including the Schedule of Expenditures of Federal Awards required by U.S. Office of Management and Budget (OMB) Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations,* is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in our audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

Van Mainen, Sietstra & Meger, PC

November 30, 2010

This section of the North Mahaska Community School District's financial report presents its discussion and analysis of the District's financial performance during the fiscal year ending June 30, 2010. The analysis focuses on school district financial performance as a whole. Please read it in conjunction with the District's financial statements, which immediately follow this section.

Financial Highlights

- The General Fund June 30, 2010 balance decreased to \$144,662 from the June 30, 2009 fund balance of \$395,279. The decrease
 resulted from anticipated overspending plus large cuts in funding that were not anticipated, including a 10% across the board state cut
 and an error in special education reporting that the state was unwilling to correct. Authority was returned for the special education
 error, but not the cash.
- The District's tax levy was raised from \$12.57 to \$13.98 in order to recover from the cuts. However, the tax levy remained low compared to many districts in lowa. SILO funds that were used to lower the tax rate required to pay debt service requirements continues to keep property taxes lower. In addition, the debt was refinanced for a savings of over \$60,000 to the district. Additional state cuts and decreasing enrollment will require maintaining the tax rate in future years.
- Special education posted a negative balance for 2009-2010 due to a lower count and additional costs of identified students. A cash
 reserve was levied to make up the negative balance as well as the state reporting error. The total amount of this cash reserve levy
 was \$271,500 to be collected in the 2010-11 school year.
- The district experienced an enrollment decrease of 10.4 students from the previous year. With 2% allowable growth, the district utilized the budget guarantee for 2009-10 and will use the guarantee again for 2010-11.
- The capital project funds were used in the construction of a new preschool building in 2007-08 and 2008-09. The building was
 occupied in January of 2009. This has depleted the SILO funds, and they are being recovered during the 2009-10 and 2010-11
 school years.

Overview of the Financial Statements

This annual report consists of three parts: management's discussion and analysis (this section), the basic financial statements (district-wide and fund statements) including notes to the financial statements, and required supplementary information. The basic financial statements include two kinds of statements that present different views of the District:

- The statement of net assets and statement of activities provide information on a district-wide basis. The statements present an
 aggregate view of the District's finances. District-wide statements contain useful long-term information as well as information for the
 just-completed fiscal year.
- The remaining statements are fund financial statements that focus on individual parts of the District, reporting the District's operations in more detail than the District-wide statements.
- The governmental funds statements tell how basic services such as regular and special education were financed in the short term as well as what remains for future spending.
- Proprietary funds statements offer short- and long- term financial information about the activities the District operates like businesses, such as food services.
- Fiduciary funds statements provide information about the financial relationships in which the District acts solely as a trustee or agent for the benefit of others.

Figure A-1 shows how the various parts of this annual report are arranged and relate to one another.

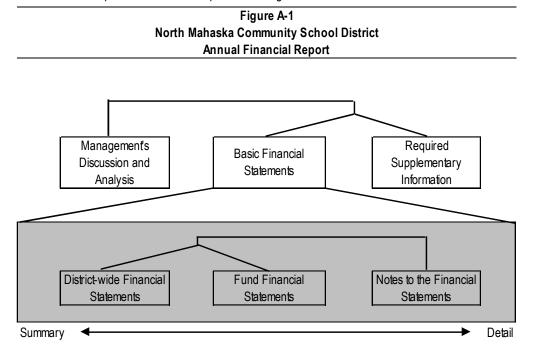

Figure A-2 summarizes the major features of the District's financial statements, including the portion of the District's activities they cover and the types of information they contain. The remainder of this overview section of the management's discussion and analysis highlights the structure and contents of each of the statements.

District-Wide Financial Statements

The District-wide statements report information about the District as a whole using accounting methods similar to those provided by private sector companies. The statement of net assets includes all of the District's net assets and how they have changed. Net assets, the difference between the District's assets and liabilities, are one way to measure the District's overall financial position. All of the current year's revenues and expenses are accounted for in the statement of activities regardless of when cash is received or paid.

- Over time, increases or decreases in the District's net assets are an indicator of whether its financial position is improving or deteriorating, respectively.
- To assess the overall financial condition of the District additional non-financial factors, such as changes in the District's property tax base and the condition of school buildings and other facilities should be considered.

In the District-wide financial statements, the District's activities are divided into two categories:

- Governmental activities: Most of the District's basic services are included here, such as regular and special education, transportation, and administration. Property taxes and state aid finance most of these activities.
- Business-type activities: The District charges fees to help it cover the costs of certain services it provides. The District's food service program is included here.

Fund Financial Statements

The fund financial statements provide more detailed information about the District's funds, focusing on its most significant or "major" funds – not the District as a whole. Funds are accounting devices the District uses to keep track of specific sources of funding and spending on particular programs.

- Some funds are required by state law and by bond covenants.
- The District establishes other funds to control and manage money for particular purposes, (such as repaying its long-term debts) or to show that it is properly using certain revenues (such as federal grants).

The District has three kinds of funds:

- Governmental funds: Most of the District's basic services are included in governmental funds, which generally focus on (1) how cash, and other financial assets that can readily be converted to cash, flow in and out and (2) the balances left at year-end that are available for spending. Consequently, the governmental funds statements provide a detailed short-term view that helps the reader determine whether there are more or fewer financial resources that can be spent in the near future to finance the District's programs. Because this information does not encompass the additional long-term focus of the District-wide statements, additional information at the bottom of the governmental funds statements explains the relationship (or differences) between them.
- Proprietary funds: Services for which the District charges a fee are generally reported in proprietary funds. Proprietary funds are
 reported in the same way as the District-wide statements. The District's enterprise funds (one type of proprietary fund) are the
 same as its business-type activities but provide more detail and additional information, such as cash flows. Internal service
 funds, (the other kind of proprietary fund) are optional and available to report activities that provide supplies and services for
 other District programs and activities. The District currently has one internal service fund, the medical reimbursement fund.
- Fiduciary funds: The District is the trustee, or fiduciary, for assets that belong to others, such as a scholarship fund. The District
 accounts for outside donations to specific District schools for specific purposes in this fund. The District is responsible for
 ensuring that the assets reported in these funds are used only for their intended purposes and by those to whom the assets
 belong. The District excludes these activities from the District-wide financial statements because it cannot use these assets to
 finance its operations.

Governmental Activities

Revenues for governmental activities were \$5,998,043 and expenses were \$5,979,073. The District saw an increase in total net assets of \$18,970. The increase was due to the recovery of lost funding through the cash reserve levy, maintaining capital asset levels while debt balances have decreased, maintenance of positive open enrollment revenues, and the collection of local option sales and service tax monies. It was not as high as past years due to the cuts in funding.

Business Type Activities

Revenues for business type activities were \$248,196 and expenses were \$223,790. Net assets increased \$24,406 from \$80,620 to \$105,026. The increase was due primarily to the delay in a transfer of funds to the general fund until after June 30. The District's business type activities include the School Nutrition Fund. Revenues of these activities were comprised of charges for service, federal, and state reimbursements and investment income. The District voted to increase meal prices for the 2010-11 school year to cover the rising expenses in the School Nutrition Fund.

Individual Fund Analysis

The financial performance of the District as a whole is reflected in its governmental funds. As the District completed the year, its governmental funds reported a combined fund balance of \$1,357,621 which is \$36,604 more than the balance of \$1,321,017 at the beginning of the year.

The individual fund analysis basically goes through each of the major school funds and tries to put in simple terms where they are and where we may want to go with them during the coming year. Please keep in mind that it is a snap shot picture of finances on June 30 of each year. The figures represent our modified accrual position on June 30, 2010, compared with where we were on June 30, 2009. You can find these figures in the June reports on expenditures, revenues, and fund balances. North Mahaska Community School District uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

Governmental Fund Highlights

General Operating Fund

In the General Fund, we had revenues and other financing sources of \$4,822,736. We had expenditures and other financing uses of \$5,073,353. Therefore, we ended the year \$250,617 in the red. We started the year with a balance of \$395,279, so we ended the year with a balance of \$144,662. The decrease was due predominantly to the special education error sited earlier in this report and the state 10% cut.

Management Fund

In the Management Fund, we expended \$134,398 and had revenues of \$84,327 meaning we spent \$50,071 more than we received. Because we started the year with \$101,773, we ended the year with a balance of \$51,702. Approximately \$176,000 will be added to this fund through the Management Levy passed for the 2010-11 budget. This is an increase from past years because the board initiated an early retirement program and experienced more unemployment claims during 2009-10. The fund is now used for the early retirement program, insurance premiums and unemployment claims. Money from this fund can be spent on insurance (other than employee health), tort liability claims, unemployment claims, and qualifying early retirement payments

Physical Plant and Equipment Levy (PPEL)

In PPEL we expended \$7,000 and received \$57,591 meaning we were \$50,591 in the black. Since we started the year with \$39,229, we finished with a balance of \$89,820. A \$7,000 used bus was the only purchase made in 2009-10. We will continue to use PPEL to purchase school buses with one planned for the 2010-11 fiscal year.

Capital Projects

We started the year with a balance of \$491,162 in all capital projects funds. We have expended \$251,179 primarily on debt service. We have received \$476,607 during the past year. The balance is now \$716,590 (an increase of \$225,428). The increase is primarily due to lower spending to make up for previous expenditures for the preschool. This fund balance, which decreased sharply as expenditures were made for the new day care / preschool facility in the 2008-09 fiscal year, will continue to build back up during the 2010-11 fiscal year, however, we will use a larger amount to pay off debt service in order to lower property taxes.

Activity Fund

The activity fund is a conglomerate of many different minor funds from athletics and music to class treasuries. The fund is in good condition over all. The beginning balance last July was \$67,950. At the end of June, it was \$123,106. The balance can fluctuate quite a bit depending on what projects are going on and when money is being paid out. This is not a fund in which you are trying to make money, but you like to keep a healthy balance to cover cash flow during the year. Most of the accounts are revolving in nature in that organizations use them for their activities. In the athletic part of the budget, some sports ran in the red, but others ran in the black. There were also some additional project expenditures that brought down the final balance in the previous year. This difference corrected itself this year which is why there appeared to be a large increase when in fact the fund has been steady.

Proprietary Fund Highlights

Nutrition Fund

The nutrition fund started the year with a balance of \$80,620. Revenues for the year totaled \$248,196 while expenditures totaled \$223,790 leaving a balance of \$105,026 - a difference of \$24,406 in the black. The increase was due primarily to the delay in a transfer of funds to the general fund until after June 30. This account has been doing well and supporting itself. Prices were increased for the 2010-11 school year due to increased wages and food costs for new nutritional standards.

Budgetary Highlights

The district's receipts were considerably less than budgeted due to the state cut.

Total expenditures were less than budgeted, due primarily to the District budget for the General Fund and cut backs because of the 10% cut. It is the District's practice to budget expenditures at the maximum authorized spending authority for the General Fund. The District then manages or controls General Fund spending through its line item budget. As a result, the District's certified budget should always exceed actual expenditures for the year.

Capital Assets

On June 30, 2010, the District had invested \$5,428,657, net of accumulated depreciation, in a broad range of capital assets, including land, buildings, athletic facilities, computers, audio-visual equipment, and transportation equipment. More detailed information about the District's capital assets is presented in Note 4 to the financial statements. Depreciation expense for the year was \$240,947.

The original cost of the District's capital assets was \$8,677,309. Of this amount \$169,413 was in the Proprietary, School Lunch Fund.

Long-Term Debt

On June 30, 2010, the District had \$1,250,000 in general obligation bonds. This represents a decrease of approximately 16% from the previous year. Additional information about the District's long-term debt is presented in Note 5 to the financial statements. Refinancing of the district bonds resulted in a savings of over \$60,000 for the life of the bonds.

Factors Bearing on the District's Future

The district remains in sound financial condition at this point. The one cent option sales tax (SILO) will continue to be a big help for many projects. The general fund status experienced a huge decrease due to the special education error and the 10% cut. Decreasing enrollment, state economic conditions, and future state cuts will further deplete the general fund forcing cutbacks in future years. The cost of insurance was higher than previous years, and future projections appear to be higher. All of these factors have put the district in a much tighter budgeting environment than it has experienced for several years. With a further decrease in enrollment and a poor economy, some of the factors enjoyed by the district in the past will not be present in the near future. This will require a combination of cuts in staff and other expenditures and finding additional funding.

Contacting the District's Financial Management

This financial report is designed to provide the District's citizens, taxpayers, customers, investors and creditors with a general overview of the district's finances and to demonstrate the District's accountability for the money it receives. If you have questions about this report or need additional financial information, contact Gloria Bartlett, Board Secretary, or Randy Moffit, Superintendent, North Mahaska Community School, P.O. Box 89, New Sharon, Iowa 50207.

Exhibit D

North Mahaska Community School District Reconciliation of the Balance Sheet Governmental Funds to the Statement of Net Assets June 30, 2010

Total fund balances of governmental funds (Exhibit C)	\$ 1,357,621
Amounts reported for governmental activities in the statement of net assets are different because:	
Capital assets used in governmental activities are not financial resources and, therefore, are not reported as assets in the governmental funds.	5,420,840
Accrued interest payable on long-term liabilities is not due and payable in the current period and, therefore, is not reported as a liability in the governmental funds.	(4,539)
Long-term liabilities, including bonds payable, bond premiums and issuance costs, early retirement, compensated absences and other postemployment benefits payable, are not due and payable in the current period and, therefore, are not reported as liabilities in the governmental funds.	(1,379,847)
Net assets of governmental activities (Exhibit A)	\$ 5,394,075

Exhibit F

North Mahaska Community School District Reconciliation of the Statement of Revenues, Expenditures and Changes in Fund Balances Governmental Funds to the Statement of Activities Year ended June 30, 2010

Net change in fund balances - total governmental funds (Exhibit E)	\$	36,604
Amounts reported for governmental activities in the statement of activities are different because:		
Capital outlays to purchase or build capital assets are reported in governmental funds as expenditures. However, those costs are reported in the Statement of Net Assets and are allocated over their estimated useful lives as depreciation expense in the Statement of Activities. The amounts of capital outlays and depreciation expense in the year are as follows: Capital outlays \$ 28,478 Depreciation expense \$ (233,721)	<u>)</u>	(205,243)
Proceeds from issuing long-term liabilities provide current financial resources to governmental funds, but issuing debt increases long-term liabilities in the Statement of Net Assets. Repayment of long-term liabilities is an expenditure in the governmental funds, but the repayment reduces long-term liabilities in the Statement of Net Assets. Also governmental funds report the effect of bond issuance costs and premiums, whereas these amounts are deferred and amortized in the Statement of Activities. Current year items are as follows:		
Proceeds from general obligation refunding bonds Issued Payments to refunded bond escrow agent Premiums on refunding general obligation refunding bonds issued Bond issuance costs Amortization of bond premiums Amortization of bond issuance costs (1,250,000) (13,956) 7,825 Amortization of bond premiums 1,994 Amortization of bond issuance costs (1,118))	304,745
Interest on long-term debt in the Statement of Activities differs from the		
amount reported in the governmental funds because interest is recorded as an expenditure in the funds when due. In the Statement of Activities, interest expense is recognized as the interest accrues, regardless of when it is due.		7,456
Some expenses reported in the Statement of Activities do not require the use of current financial resources and, therefore, are not reported as expenditures in the governmental funds, as follows.		
Early retirement (75,000) Compensated absences (15,565))	
Other postemployment benefits (34,027))	(124,592)
Change in net assets of governmental activities (Exhibit B)	\$	18,970

(1) Summary of Significant Accounting Policies

North Mahaska Community School District is a political subdivision of the State of Iowa and operates public schools for children in grades kindergarten through twelve and special education pre-kindergarten. Additionally, the District either operates or sponsors various adult education programs. These courses include remedial education as well as vocational and recreational courses. The geographic area served includes the City of New Sharon, Iowa and the predominate agricultural territory in Mahaska and Poweshiek counties. The District is governed by a Board of Education whose members are elected on a non-partisan basis.

The District's financial statements are prepared in conformity with U.S. generally accepted accounting principles as prescribed by the Governmental Accounting Standards Board.

A. Reporting Entity

For financial reporting purposes, North Mahaska Community School District has included all funds, organizations, agencies, boards, commissions and authorities. The District has also considered all potential component units for which it is financially accountable and other organizations for which the nature and significance of their relationship with the District are such that exclusion would cause the District's financial statements to be misleading or incomplete. The Governmental Accounting Standards Board has set forth criteria to be considered in determining financial accountability. These criteria include appointing a voting majority of an organization's governing body and (1) the ability of the District to impose its will on that organization or (2) the potential for the organization to provide specific benefits to or impose specific financial burdens on the District. The North Mahaska Community School District has no component units which meet the Governmental Accounting Standards Board criteria.

<u>Jointly Governed Organization</u> - The District participates in a jointly governed organization that provides services to the District but does not meet the criteria of a joint venture since there is no ongoing financial interest or responsibility by the participating governments. The District is a member of the Mahaska County Assessor's Conference Board.

B. Basis of Presentation

Government-wide Financial Statements - The Statement of Net Assets and the Statement of Activities report information on all of the non-fiduciary activities of the District. For the most part, the effect of interfund activity has been removed from these statements. Governmental activities, which normally are supported by tax and intergovernmental revenues, are reported separately from business type activities, which rely to a significant extent on fees and charges for service.

The Statement of Net Assets presents the District's non-fiduciary assets and liabilities, with the difference reported as net assets. Net assets are reported in three categories:

Invested in capital assets, net of related debt consists of capital assets, net of accumulated depreciation and reduced by outstanding balances for bonds, notes and other debt attributable to the acquisition, construction or improvement of those assets.

Restricted net assets result when constraints placed on net asset use are either externally imposed or imposed by law through constitutional provisions or enabling legislation.

Unrestricted net assets consist of net assets that do not meet the definition of the two preceding categories. Unrestricted net assets often have constraints on resources imposed by management which can be removed or modified.

The Statement of Activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. Direct expenses are those clearly identifiable with a specific function. Program revenues include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function and 2) grants, contributions and interest restricted to meeting the operational or capital requirements of a particular function. Property tax and other items not properly included among program revenues are reported instead as general revenues.

<u>Fund Financial Statements</u> - Separate financial statements are provided for governmental, proprietary and fiduciary funds, even though the latter are excluded from the government-wide financial statements. Major individual governmental funds are reported as separate columns in the fund financial statements. All remaining governmental funds are aggregated and reported as non-major governmental funds.

Governmental Fund Types: Governmental fund types are those funds through which most governmental functions typically are financed. Governmental fund reporting focuses on the sources, uses and balances of current financial resources. Expendable assets are assigned to the various governmental funds according to the purposes for which they may or must be used. Current liabilities are assigned to the fund from which they will be paid. The difference between governmental fund assets and liabilities is reported as fund balance. The following are the District's major governmental funds:

<u>General Fund</u>: The General Fund is the general operating fund of the District. All general tax revenues and other revenues not allocated by law or contractual agreement to some other fund are accounted for in this fund. From the fund are paid the general operating expenditures, including instructional, support and other costs.

<u>Debt Service Fund</u>: The Debt Service Fund is utilized to account for the payment of interest and principal on the District's general long-term debt.

<u>Capital Projects Fund</u>: The Capital Projects Fund is used to account for all resources used in the acquisition and construction of capital facilities.

The other governmental funds of the District are considered non-major and are as follows:

<u>Special Revenue Funds</u>: The Special Revenue Funds account for the revenue sources that are legally restricted to expenditures for specific purposes. These funds consist of the following:

Student Activity Funds: This fund accounts for transactions that occur due to student-related activities from groups and organizations such as athletic and activity events, fundraising and other extra-curricular or co-curricular activities.

Management Fund: This fund is authorized by lowa Code Section 298.4 and accounts for transactions related to unemployment, early retirement, judgments and settlements and the cost of liability insurance as it relates to property and casualty.

Physical Plant and Equipment Levy (PPEL) Fund: This fund is authorized by lowa Code 298.2 and accounts for transactions related to the improvement of facilities and grounds, construction of school houses, certain equipment expenditures and other expenditures authorized in lowa Code 298.3.

Proprietary Fund Types: Proprietary fund types are used to account for the District's ongoing organizations and activities which are similar to those often found in the private sector. The measurement focus is upon income determination, financial position and cash flows. The following are the District's proprietary funds:

<u>Enterprise Funds</u>: Enterprise funds are used to account for those operations that are financed and operated in a manner similar to private business or where the District has decided that the determination of revenues earned, costs incurred and/or net income is necessary for management accountability. In accordance with Governmental Accounting Standards Board (GASB) Statement No. 20, Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities that Use Proprietary Fund Accounting, the District has elected to apply all applicable Financial Accounting Standards Board (FASB) pronouncements, issued on or before November 30, 1989, except for those pronouncements which conflict with or contradict GASB pronouncements.

The following enterprise fund of the District is considered non-major:

School Nutrition Fund: This fund accounts for transactions related to the school lunch, breakfast and summer food programs authorized by Iowa Code 283A.

Fiduciary Fund Types: Fiduciary funds focus on net assets and changes in net assets. The District's fiduciary funds include the following:

<u>Private Purpose Trust Fund</u>: This fund is used to account for assets held by the District under trust agreements which require income earned to be used to benefit individuals through scholarship awards.

<u>Agency Fund</u>: This fund is used to account for assets held by the District as an agent for individuals, private organizations, and other governments. The Agency Fund is custodial in nature, assets equal liabilities, and does not involve measurement of results of operations.

C. Measurement Focus and Basis of Accounting

The government-wide, proprietary and fiduciary fund financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property tax is recognized as revenue in the year for which it is levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been satisfied.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers revenues to be available if they are collected within 60 days after year end.

Property tax, intergovernmental revenues (shared revenues, grants and reimbursements from other governments) and interest associated with the current fiscal period are all considered to be susceptible to accrual. All other revenue items are considered to be measurable and available only when cash is received by the District.

Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, principal and interest on long-term debt, claims and judgments and compensated absences are recognized as expenditures only when payment is due. Capital asset acquisitions are reported as expenditures in governmental funds. Proceeds of general long-term debt and acquisitions under capital leases are reported as other financing sources.

Under the terms of grant agreements, the District funds certain programs by a combination of specific cost-reimbursement grants and general revenues. Thus, when program expenses are incurred, there are both restricted and unrestricted net assets available to finance the program. It is the District's policy to first apply cost-reimbursement grant resources to such programs, and then general revenues.

The proprietary fund of the District applies all applicable GASB pronouncements, as well as the following pronouncements issued on or before November 30, 1989, unless these pronouncements conflict with or contradict GASB pronouncements: Financial Accounting Standards Board Statements and Interpretations, Accounting Principles Board Opinions, and Accounting Research Bulletins of the Committee on Accounting Procedure.

Proprietary funds distinguish operating revenues and expenses from non-operating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the District's Enterprise Fund is charges to customers for sales and services. Operating expenses for enterprise funds include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

The District maintains its financial records on the cash basis. The financial statements of the District are prepared by making memorandum adjusting entries to the cash basis financial records.

D. <u>Assets, Liabilities and Fund Equity</u>

The following accounting policies are followed in preparing the financial statements:

<u>Cash, Pooled Investments and Cash Equivalents</u> - The cash balances of most District funds are pooled and invested. Investments are stated at fair value except for the investment in the lowa Schools Joint Investment Trust which is valued at amortized cost.

For purposes of the statement of cash flows, all short-term cash investments that are highly liquid are considered to be cash equivalents. Cash equivalents are readily convertible to known amounts of cash and, at the day of purchase, have a maturity date no longer than three months.

<u>Property Tax Receivable</u> - Property tax in governmental funds is accounted for using the modified accrual basis of accounting.

Property tax receivable is recognized in these funds on the levy or lien date, which is the date the tax asking is certified by the Board of Education. Delinquent property tax receivable represents unpaid taxes for the current and prior years. The succeeding year property tax receivable represents taxes certified by the Board of Education to be collected in the next fiscal year for the purposes set out in the budget for the next fiscal year. By statute, the District is required to certify its budget in April of each year for the subsequent fiscal year. However, by statute, the tax asking and budget certification for the following fiscal year becomes effective on the first day of that year. Although the succeeding year property tax receivable has been recorded, the related revenue is deferred in both the government-wide and fund financial statements and will not be recognized as revenue until the year for which it is levied.

Property tax revenue recognized in these funds become due and collectible in September and March of the fiscal year with a 1½% per month penalty for delinquent payments; is based on January 1, 2008 assessed property valuations; is for the tax accrual period July 1, 2009 through June 30, 2010 and reflects the tax asking contained in the budget certified to the County Board of Supervisors in April, 2009.

<u>Due from Other Governments</u> - Due from other governments represents amounts due from the State of Iowa, various shared revenues, grants and reimbursements from other governments.

<u>Inventories</u> - Inventories are valued at cost using the first-in, first-out method for purchased items and government commodities. Inventories of proprietary funds are recorded as expenses when consumed rather than when purchased or received.

<u>Capital Assets</u> - Capital assets, which include property, furniture and equipment, are reported in the applicable governmental or business type activities columns in the government-wide Statement of Net Assets. Capital assets are recorded at historical cost. Donated capital assets are recorded at estimated fair market value at the date of donation. The costs of normal maintenance and repair that do not add to the value of the asset or materially extend asset lives are not capitalized. Capital assets are defined by the District as assets with an initial, individual cost in excess of the following thresholds and estimated useful lives in excess of two years.

Asset Class	<u>Amount</u>
Land	\$ 2,500
Buildings	2,500
Improvements other than buildings	2,500
Furniture and equipment:	
School Nutrition Fund equipment	500
Other furniture and equipment	2,500

Capital assets are depreciated using the straight line method over the following estimated useful lives:

Estimated Useful Lives Asset Class (In Years)
Buildings 50 years Improvements other than buildings 20-40 years Furniture and equipment 5-20 years

<u>Salaries and Benefits Payable</u> - Payroll and related expenditures for teachers with annual contracts corresponding to the current school year, which are payable in July and August, have been accrued as liabilities.

<u>Deferred and Unearned Revenue</u> - Although certain revenues are measurable, they are not available. Available means collected within the current period or expected to be collected soon enough thereafter to be used to pay liabilities of the current period. Deferred revenue in the governmental fund financial statements represent the amount of assets that have been recognized, but the related revenue has not been recognized since the assets are not collected within the current period or expected to be collected soon enough thereafter to be used to pay liabilities of the current period. Deferred revenue consists of unspent grant proceeds as well as the succeeding year's property tax receivable.

Unearned revenue on the Statement of Net Assets consists of unspent grant proceeds as well as the succeeding year's property tax receivable that will not be recognized as revenue until the year for which it is levied.

Compensated Absences – District employees accumulate a limited amount of earned but unused vacation for subsequent use or for payment upon termination, death or retirement. A liability is recorded when incurred in the government-wide financial statements. A liability for these amounts is reported in governmental fund financial statements only for employees that have resigned or retired. The compensated absences liability has been computed based on rates of pay in effect at June 30, 2010. The compensated absences liability attributable to the governmental activities will be paid primarily by the General Fund.

<u>Long-term liabilities</u> - In the government-wide financial statements, long-term debt and other long-term obligations are reported as liabilities in the governmental activities column in the Statement of Net Assets.

<u>Fund Equity</u> - In the governmental fund financial statements, reservations of fund balance are reported for amounts not available for appropriation or legally restricted by outside parties for use for a specific purpose.

<u>Restricted Net Assets</u> - In the government-wide Statement of Net Assets, net assets are reported as restricted when constraints placed on net asset use are either externally imposed by creditors, grantors, contributors or laws and regulations of other governments or imposed by law through constitutional provisions or enabling legislation.

E. Budgets and Budgetary Accounting

The budgetary comparison and related disclosures are reported as Required Supplementary Information. During the year ended June 30, 2010, expenditures exceeded the amount budgeted in the instruction functional area.

(2) Cash and Pooled Investments

The District's deposits in banks at June 30, 2010 were entirely covered by federal depository insurance or by the State Sinking Fund in accordance with Chapter 12C of the Code of Iowa. This chapter provides for additional assessments against the depositories to insure there will be no loss of public funds.

The District is authorized by statute to invest public funds in obligations of the United States government, its agencies and instrumentalities; certificates of deposit or other evidences of deposit at federally insured depository institutions approved by the Board of Education; prime eligible bankers acceptances; certain high rated commercial paper; perfected repurchase agreements; certain registered open-end management investment companies; certain joint investment trusts; and warrants or improvement certificates of a drainage district.

At June 30, 2010, the District had investments in the Iowa Schools Joint Investment Trust as follows:

Diversified Portfolio

Amortized Cost \$1,266,464

The investments are valued at an amortized cost pursuant to Rule 2a-7 under the Investment Company Act of 1940.

Credit risk. The investments in the Iowa Schools Joint Investment Trust were rated Aaa by Moody's Investors Service.

(3) Interfund Transfers

The detail of interfund transfers for the year ended June 30, 2010 is as follows:

Transfer to	Transfer from	Amount	
Debt service	Capital projects	\$ 201,185	
Student activity	General	 1,782	
		\$ 202,967	

Transfers generally move revenues from the fund statutorily required to collect the resources to the fund statutorily required to expend the resources.

(4) Capital Assets

Capital assets activity for the year ended June 30, 2010 was as follows:

		Balance			Rals	ance End of

	Total	\$	1,250,000	84,686	1,334,686	

(6) Pension and Retirement Benefits

The District contributes to the Iowa Public Employees Retirement System (IPERS), which is a cost-sharing multiple-employer defined benefit pension plan administered by the State of Iowa. IPERS provides retirement and death benefits which are established by state statute to plan members and beneficiaries. IPERS issues a publicly available financial report that includes financial statements and required supplementary information. The report may be obtained by writing to IPERS, P.O. Box 9117, Des Moines, Iowa, 50306-9117.

Plan members are required to contribute 4.30% of their annual covered salary and the District is required to contribute 6.65% of annual covered salary. Contribution requirements are established by state statute. The District's contributions to IPERS for the years ended June 30, 2010, 2009 and 2008 were \$214,082, \$203,265, and \$171,403, respectively, equal to the required contributions for each year.

(7) Other Post-Employment Benefits (OPEB)

<u>Plan Description</u> - The District operates a retiree benefit plan which provides medical and prescription drug benefits for retirees and their spouses. There are 71 active and 2 retired members in the plan. Participants must be age 55 or older at retirement.

The medical/prescription drug coverage is purchased through an outside provider. Retirees under age 65 pay the same premium for the medical/prescription drug benefit as active employees, which results in an implicit subsidy and an OPEB liability.

<u>Funding Policy</u> - The contribution requirements of plan members are established and may be amended by the District. The District currently finances the retiree benefit plan on a pay-as-you-go basis.

Annual OPEB Cost and Net OPEB Obligation - The District's annual OPEB cost is calculated based on the annual required contribution (ARC) of the District, an amount actuarially determined in accordance with GASB Statement No. 45. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and amortize any unfunded actuarial liabilities over a period not to exceed 30 years.

The following table shows the components of the District's annual OPEB cost for the year ended June 30, 2010, the amount actually contributed to the plan and changes in the District's net OPEB obligation:

Annual OPEB cost	\$ 83,000
Contributions made	(47,000)
Increase in net OPEB obligation	36,000
Net OPEB obligation beginning of year	-
Net OPEB obligation end of year	\$ 36,000

For calculation of the net OPEB obligation, the actuary has set the transition day as July 1, 2009. The end of year net OPEB obligation was calculated by the actuary as the cumulative difference between the actuarially determined funding requirements and the actual contributions for the year ended June 30, 2010.

For the year ended June 30, 2010, the District contributed \$47,000 to the medical plan. Plan members eligible for benefits were not required to contribute.

The District's annual OPEB cost, the percentage of annual OPEB cost contributed to the plan and the net OPEB obligation as of June 30, 2010 are summarized as follows:

		Percentage of	
	Annual OPEB	Annual OPEB	Net OPEB
Year Ended	Cost	Cost Contributed	Obligation
June 30, 2010	\$ 83,000	56.63%	36,000

<u>Funded Status and Funding Progress</u> - As of July 1, 2009, the most recent actuarial valuation date for the period July 1, 2009 through June 30, 2010, the actuarial accrued liability was \$615,000, with no actuarial value of assets, resulting in an unfunded actuarial accrued liability (UAAL) of \$615,000. The covered payroll (annual payroll of active employees covered by the plan) was approximately \$3,200,000, and the ratio of the UAAL to covered payroll was 19.2%. As of June 30, 2010, there were no trust fund assets.

Actuarial Methods and Assumptions - Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality and the health care cost trend. Actuarially determined amounts are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The Schedule of Funding Progress, presented as required supplementary information in the section following the Notes to Financial Statements, presents multiyear trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liabilities for benefits.

Projections of benefits for financial reporting purposes are based on the plan as understood by the employer and the plan members and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point. The actuarial methods and assumptions used include techniques designed to reduce the effects of short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of the calculations.

As of the July 1, 2009 actuarial valuation date, the unit credit actuarial cost method was used. The actuarial assumption includes a 4.5% discount rate based on the District's funding policy. The projected annual medical trend rate is 11%. The ultimate medical trend rate is 5%. The medical trend rate is reduced 0.5% each year until reaching the 5% ultimate trend rate.

Mortality rates are from the RP2000 Group Annuity Mortality Table, applied on a gender-specific basis. Annual retirement and termination probabilities were developed from the retirement probabilities from the IPERS Actuarial Report as of June 30, 2007 and applying the termination factors used in the IPERS Actuarial Report as of June 30, 2007.

The salary increase rate was assumed to be 3.5% per year. The UAAL is being amortized as a level percentage of projected payroll expense on an open basis over 30 years.

(8) Risk Management

The District is exposed to various risks of loss related to torts; theft; damage to and destruction of assets; errors and omissions; injuries to employees; and natural disasters. These risks are covered by the purchase of commercial insurance. The District assumes liability for any deductibles and claims in excess of coverage limitations. Settled claims from these risks have not exceeded commercial insurance coverage in any of the past three fiscal years.

(9) Area Education Agency

The District is required by the Code of lowa to budget for its share of special education support, media and educational services provided through the area education agency. The District's actual amount for this purpose totaled \$213,983 for the year ended June 30, 2010 and is recorded in the General Fund by making a memorandum adjusting entry to the cash basis financial statements.

This budgetary comparison is presented as Required Supplementary Information in accordance with *Governmental Accounting Standards* Board Statement No. 41 for governments with significant budgetary perspective differences resulting from not being able to present budgetary comparisons for the General Fund and each major Special Revenue Fund.

In accordance with the Code of Iowa, the Board of Education annually adopts a budget following required public notice and hearing for all funds except Private Purpose Trust and Agency Funds. The budget may be amended during the year utilizing similar statutorily prescribed procedures. The District's budget is prepared on a GAAP basis.

Formal and legal budgetary control for the certified budget is based upon four major classes of expenditures known as functions, not by fund. These four functions are instruction, support services, non-instructional programs and other expenditures. Although the budget document presents function expenditures or expenses by fund, the legal level of control is at the aggregated function level, not by fund. The Code of lowa also provides District expenditures in the General Fund may not exceed the amount authorized by the school finance formula

During the year ended June 30, 2010, expenditures in the instruction function exceeded the amount budgeted.

Basis of Presentation - The Schedule of Expenditures of Federal Awards includes the federal grant activity of the Davis County Community School District and is presented in conformity with the accrual or modified accrual basis of accounting. The information on this schedule is presented in accordance with the requirements of OMB Circular A-133, <u>Audits of States, Local Governments, and Non-Profit Organizations</u>. Therefore, some amounts presented in this schedule may differ from amounts presented in, or used in the preparation of, the basic financial statements.

North Mahaska Community School District

Independent Auditor's Report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with Government Auditing Standards

To the Board of Education of North Mahaska Community School District:

We have audited the accompanying financial statements of the governmental activities, the business type activities, each major fund and the aggregate remaining fund information of the North Mahaska Community School District, New Sharon, Iowa, as of and for the year ended June 30, 2010, which collectively comprise the District's basic financial statements listed in the table of contents and have issued our report thereon dated November 30, 2010. We conducted our audit in accordance with U.S. generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered North Mahaska Community School District's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of North Mahaska Community School District's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of North Mahaska Community School District's internal control over financial reporting.

Our consideration of internal control over financial reporting was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control over financial reporting that might be significant deficiencies or material weaknesses and, therefore, there can be no assurance all deficiencies, significant deficiencies or material weaknesses have been identified. However, as described in the accompanying Schedule of Findings and Questioned Costs, we identified a deficiency in internal control over financial reporting we consider to be a material weakness.

A deficiency in internal control exists when the design or operation of the control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility a material misstatement of the District's financial statements will not be prevented or detected and corrected on a timely basis. We consider the deficiency in internal control described in the accompanying Schedule of Findings and Questioned Costs as items II-A-10 to be a material weakness.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether North Mahaska Community School District's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, non-compliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of non-compliance or other matters that are required to be reported under *Government Auditing Standards*. However, we noted certain immaterial instances of non-compliance or other matters that are described in Part IV of the accompanying Schedule of Findings and Questioned Costs.

Comments involving statutory and other legal matters about the District's operations for the year ended June 30, 2010 are based exclusively on knowledge obtained from procedures performed during our audit of the financial statements of the District. Since our audit was based on tests and samples, not all transactions that might have had an impact on the comments were necessarily audited. The comments involving statutory and other legal matters are not intended to constitute legal interpretations of those statutes.

North Mahaska Community School District's responses to findings identified in our audit are described in the accompanying Schedule of Findings and Questioned Costs. While we have expressed our conclusions on the District's responses, we did not audit North Mahaska Community School District's responses and, accordingly, we express no opinion on them.

This report, a public record by law, is intended solely for the information and use of the officials, employees and citizens of North Mahaska Community School District and other parties to whom North Mahaska Community School District may report, including federal awarding agencies and pass-through entities. This report is not intended to be and should not be used by anyone other than these specified parties.

We would like to acknowledge the many courtesies and assistance extended to us by personnel of North Mahaska Community School District during the course of our audit. Should you have any questions concerning any of the above matters, we shall be pleased to discuss them with you at your convenience.

Independent Auditor's Report on Compliance with Requirements Applicable to Each Major Program and on Internal Control over Compliance in Accordance with OMB Circular A-133

To the Board of Education of North Mahaska Community School District:

Compliance

We have audited the compliance of North Mahaska Community School District with the types of compliance requirements described in U.S. Office of Management and Budget (OMB) Circular A-133 *Compliance Supplement* that are applicable to each of its major federal programs for the year ended June 30, 2010. North Mahaska Community School District's major federal programs are identified in Part I of the accompanying Schedule of Findings and Questioned Costs. Compliance with the requirements of laws, regulations, contracts and grant agreements applicable to each of its major federal programs is the responsibility of North Mahaska Community School District's management. Our responsibility is to express an opinion on North Mahaska Community School District's compliance based on our audit.

We conducted our audit of compliance in accordance with U.S. generally accepted auditing standards, the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether non-compliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about North Mahaska Community School District's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe our audit provides a reasonable basis for our opinion. Our audit does not provide a legal determination on North Mahaska Community School District's compliance with those requirements.

In our opinion, North Mahaska Community School District complied, in all material respects, with the requirements referred to above that are applicable to each of its major federal programs for the year ended June 30, 2010.

Internal Control Over Compliance

The management of North Mahaska Community School District is responsible for establishing and maintaining effective internal control over compliance with requirements of laws, regulations, contracts and grant agreements applicable to federal programs. In planning and performing our audit, we considered North Mahaska Community School District's internal control over compliance with requirements that could have a direct and material effect on a major federal program in order to determine our auditing procedures for the purpose of expressing our opinion on compliance and to test and report on internal control over compliance in accordance with OMB Circular A-133, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of North Mahaska Community School District's internal control over compliance.

Our consideration of internal control over compliance was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control over compliance that might be significant deficiencies or material weaknesses and, therefore, there can be no assurance all deficiencies, significant deficiencies or material weaknesses have been identified. However, as discussed below, we identified a deficiency in internal control over compliance we consider to be a material weakness.

A deficiency in the District's internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect and correct noncompliance with a type of compliance requirement of a federal program on a timely basis. A material weakness in internal control over compliance is a deficiency, or combination of deficiencies, in internal control over compliance such that there is a reasonable possibility material noncompliance with a type of compliance requirement of a federal program will not be prevented or detected and corrected on a timely basis. We consider the deficiency in internal control over compliance described in the accompanying Schedule of Findings and Questioned Costs as item III-A-10 to be a material weakness.

North Mahaska Community School District's responses to the findings identified in our audit are described in the accompanying Schedule of Findings and Questioned Costs. While we expressed our conclusions on the District's responses, we did not audit North Mahaska Community School District's responses and, accordingly, we express no opinion on them.

This report, a public record by law, is intended solely for the information and use of the officials, employees and citizens of North Mahaska Community School District and other parties to whom North Mahaska Community School District may report, including federal awarding agencies and pass-through entities. This report is not intended to be and should not be used by anyone other than these specified parties.

November 30, 2010

Part I: Summary of the Independent Auditor's Results:

- (a) Unqualified opinions were issued on the financial statements.
- (b) A material weakness in internal control over financial reporting was disclosed by the audit of the financial statements.
- (c) The audit did not disclose any non-compliance which is material to the financial statements.
- (d) A material weakness in internal control over major programs was disclosed by the audit of the financial statements.
- (e) An unqualified opinion was issued on compliance with requirements applicable to each major program.
- (f) Major programs were as follows:
 - CFDA Number 84.394 ARRA State Fiscal Stabilization Fund (SFSF) Education State Grants, Recovery Act
 - Clustered programs:
 - CFDA Number 10.553 School Breakfast Program
 - CFDA Number 10.555 National School Lunch Program
- (g) The dollar threshold used to distinguish between Type A and Type B programs was \$300,000.
- (h) North Mahaska Community School District did not qualify as a low-risk auditee.

Part II: Findings Related to the Financial Statements:

INTERNAL CONTROL DEFICIENCY:

II-A-10 Segregation of Duties – The limited number of office personnel prevents a proper segregation of accounting functions necessary to assure adequate internal control. This is not unusual in Districts of your size, but the Board should constantly be aware of this condition and realize that concentration of duties and responsibilities in a limited number of individuals is not desirable from a control point of view. Under these conditions, the most effective controls lie in the Board's knowledge of matters relating to the District's operations.

<u>Recommendation</u> - We realize that with a limited number of office employees, segregation of duties is difficult. However, the District should review its procedures to obtain the maximum internal control possible under the circumstances.

Response - We will continue to review our procedures and implement additional controls where possible.

Conclusion - Response accepted.

INSTANCES OF NON-COMPLIANCE:

No matters were noted.

Part III: Findings for Federal Awards:

INSTANCES OF NON-COMPLIANCE:

No matters were noted.

INTERNAL CONTROL DEFICIENCY:

CFDA Number 10.553: School Breakfast Program
CFDA Number 10.555: National School Lunch Program

Federal Award Year: 2010 U.S. Department of Agriculture

Passed through the Iowa Department of Education

CFDA Number 84.394: ARRA - State Fiscal Stabilization Fund (SFSF) - Education State Grants, Recovery Act

Federal Award Year: 2010 U.S. Department of Education

Passed through the Iowa Department of Education

III-A-10 Segregation of Duties – The limited number of office personnel prevents a proper segregation of accounting functions necessary to assure adequate internal control. This is not unusual in Districts of your size, but the Board should constantly be aware of this condition and realize that concentration of duties and responsibilities in a limited number of individuals is not desirable from a control point of view. Under these conditions, the most effective controls lie in the Board's knowledge of matters relating to the District's operations.

Recommendation - We realize that with a limited number of office employees, segregation of duties is difficult. However, the District should review its procedures to obtain the maximum internal control possible under the circumstances.

<u>Response</u> - We will continue to review our procedures and implement additional controls where possible.

Conclusion - Response accepted.

Part IV: Other Findings Related to Required Statutory Reporting:

IV-A-10 <u>Certified Budget</u> - Expenditures for the year ended June 30, 2010, exceeded the certified budget amount in the instruction functional area.

Recommendation - The certified budget should have been amended in accordance with Chapter 24.9 of the Code of lowa before expenditures were allowed to exceed the budget.

Response - Future budgets will be amended in sufficient amounts to ensure the certified budget is not exceeded.

Conclusion - Response accepted.

- IV-B-10 Questionable Expenditures No expenditures that may not meet the requirements of public purpose as defined in an Attorney General's opinion dated April 25, 1979 were noted.
- IV-C-10 <u>Travel Expense</u> No expenditures of District money for travel expenses of spouses of District officials or employees were noted. No travel advances to District officials or employees were noted.
- IV-D-10 Business Transactions No business transactions between the District and District officials or employees were noted.

- IV-E-10 <u>Bond Coverage</u> Surety bond coverage of District officials and employees is in accordance with statutory provisions. The amount of coverage should be reviewed annually to ensure that coverage is adequate for current operations.
- IV-F-10 Board Minutes No transactions requiring Board approval which had not been approved by the Board were noted.
- IV-G-10 Certified Enrollment A variance in the basic enrollment data certified to the Department of Education was noted.

Recommendation – The certified enrollment data should be corrected.

Response – We will attempt to correct certified enrollment errors in the future.

Conclusion – Response accepted.

- IV-H-10 Supplementary Weighting No variances regarding the supplementary weighting certified to the lowa Department of Education were noted.
- IV-I-10 <u>Deposits and Investments</u> No instances of noncompliance with the deposit and investment provisions of Chapter 12B and 12C of the Code of Iowa and the District's investment policy were noted.
- IV-J-10 <u>Certified Annual Report</u> The Certified Annual Report was filed with the Department of Education timely and we noted no significant deficiencies in the amounts reported.
- IV-K-10 <u>Categorical Funding</u> No instances were noted of categorical funding used to supplant rather than supplement other funds.
- IV-L-10 <u>Statewide Sales, Services and Use Tax</u> No instances of non-compliance with the use of the statewide sales, services and use tax revenue provisions of Chapter 423F.3 of the Code of lowa were noted.

Pursuant to Chapter 423F.5 of the Code of lowa, the annual audit is required to include certain reporting elements related to the statewide sales, services and use tax revenue. For the year ended June 30, 2010, the District's financial activity and other required information for the statewide sales, services and use tax revenue are as follows:

Beginning balance	\$	-
Statewide sales and services tax revenue		457,475
Expenditures/transfers out		
School infrastructure:		
Facilities acquisition and construction	49,994	
Debt service for school infrastructure:		
General obligation debt	201,185	251,179
Ending balance	\$	206,296

The statewide sales, services and use tax revenue received during the year ended June 30, 2010 is equivalent to a reduction in the following levies:

	Per \$	1000 of	Property Tax	
	Taxable Valuation		Dollars	
Debt service levy	\$	2.62307	\$	457,475
